STATEMENT ON ESTANCIA WATER ISSUE

August 13, 2025

On the morning of Wednesday, August 13, 2025, the Town of Estancia installed a new well pump at Well #8. This pump will be operational on or about 5pm on August 13, 2025. The new well pump has the capacity to produce 150 gallons of water per minute. The Town is requesting that residents continue to conserve water through the weekend to allow the tank to refill and repressurize the Town's water system.

Bottled water will continue to be available for water customers of the Town of Estancia and can be picked up at the Estancia Fire Department located at 1001 E. Highland Avenue Estancia, NM 87016.

A full statement regarding the well issue and the steps taken by the Town to address this issue will be drafted and disseminated by the end of the week.

Respectfully,

J. Jordan Barela
